Contemporary Brickwork

INTEGRATED-WALLING

Overview

Traditionally our strongest discipline, turning out brick work of the highest quality in the most efficient manor has gained I-W much respect within the construction industry.

Never shy of projects that require unusual techniques or materials to be crafted together, I-W have an unrivalled depth of experience in the art of brick laying.

Picture below is of the Kimberley office development, Stewartby, winner of Best Commercial Building at the 2010 Brick Awards.

Projects

- ▣ Guildford Education Campus
- ▣ Cabot Circus, Bristol
- ▣ British Library, London
- ▣ Trafford Centre, Manchester
- ▣ Paternoster Square, London
- ▣ Project Kimberley, Stewartby

Featured Project - Guildford Education Campus

Supreme Winner at the 2009 Brick Awards, the project utilizes the Istock Cottbus Special Format semi-glazed brick. Although deep maroon in colour, they appear almost silver when reflecting sunlight

The same brick is used on both campus buildings but the difference in treatment gives each building its own identity. The smooth fourth face of Pond Meadows contrasts with the deeply recessed openings of Christ's College. According to the judges, *"Both buildings are carefully detailed and skillfully built."*
